MINUTES OF THE MEETING OF THE COMMISSION OF FINE ARTS
HELD IN WASHINGTON, D.C.

I. CONVENE, ROOM 7000, INTERIOR DEPARTMENT BUILDING

A regular meeting of the Commission of Fine Arts was held in its offices in the Interior Department Building on 12 January 1965. The members met pursuant to notice, in executive session at 10:15 with William Walton, Chairman, presiding.

Present were: William Walton
Gordon Bunshaft
Burnham Kelly
Theodore Roszak
Aline Saarinen
Hideo Sasaki
John Carl Warnecke

Staff: C. H. Atherton, Secretary
Paul Richard, Administrative Assistant
Myra Younker, Editor

NCPC: Donald Bozarth

Recorder: Alice Chiang

II. ADMINISTRATION

1. The Commission decided to hold its next meeting on 16-17 February 1965.

2. The minutes of the November meeting were approved as written.

3. Resolution on the Retirement of Mr. Wilson

Chairman Walton requested the members to review a draft of a letter to Mr. Linton R. Wilson, Secretary of the Commission of Fine Arts from July 1954 to December 1964, commenting on his retirement and giving recognition of his service to the Commission. The members were asked to make any additional statements they wished concerning Mr. Wilson's service to the Commission. The letter and comments will be discussed on the following day.

4. Introduction of New Staff Members

The Secretary introduced two new staff members, Miss Nancy J. Coyne who is to be Legislative Representative of the Commission, and

Mr. Paul Richard, who is to be Administrative Assistant to the Commission.

5. Proposed Programs and Budget Estimates for Fiscal Year 1966

The Secretary reported that the Commission had received tentative approval on a $10,000 fund for contracting specialists on projects pertaining to the work of the Commission. Until Congressional approval is received, surplus funds of the Commission could be used for special studies proposed for the following projects.

a. Amendments to the Shipstead-Luce Act

The Secretary stated that with the adoption of the Pennsylvania Avenue Plan, the Shipstead-Luce Act should be amended to include the area from Pennsylvania Avenue to F Street and from 15th Street to Judiciary Square. He commented that an entire block should be included in the area rather than just the street in the block which was adjacent to public buildings and grounds, as currently specified in the Act.

Chairman Walton stated that the Shipstead-Luce Act should conform more clearly with the purposes of the Commission of Fine Arts. He commented that no specific line should be designated as variations would occur and would require further amendments.

The members agreed that the Shipstead-Luce Act should be amended to include additional areas. A study should be made of the areas requiring more control and legislation drafted which would permit the Commission to function more effectively. If necessary, specialists should be contracted to supplement the staff in this assignment.

b. Study of Highways and Street Signs

Chairman Walton commented that District Commissioner Walter Tobriner had appointed a small architectural committee for beautifying the city by improving the designs and locations of signs. The aim of the Committee was to persuade sign companies to improve the design of signs.

Chairman Walton stated that Arthur H. Keyes, Jr., Chairman of the Committee, had expressed the thought that a local graphic artist be employed. Mr. Roszak commented that finding talent would be a problem.

The members agreed that the Commission should sponsor any program that will improve the design and location of signs in the city and along the highways. The interest of President and Mrs. Johnson in this project and the campaign of local newspapers in improving the locations and designs of signs within the city was mentioned.

c. Amendments to Sign Regulations, D.C. Building Code

The Secretary stated that the Washington Post was conducting

a campaign to improve the location and design of signs and had requested that amendments to sign regulations be discussed by the Commission of Fine Arts.

The members agreed that an amendment to sign regulations of the D.C. Building Code was necessary to make it more stringent.

III. SUBMISSIONS-REVIEWS-INTERVIEWS

1. Department of the Interior, National Park Service, National Capital Region

a. Development of the Mall

The Secretary presented and explained the drawings for the development of the Mall as proposed by Mr. Richard K. Webel, consultant to the Secretary of the Interior, Stewart L. Udall, on this project. The proposed design did not depart from the L'Enfant Plan of 1791 nor from the McMillan Plan of 1901. The beauty of the Mall, developed from these Plans, would be increased and the area would be made more interesting and lively.

A tunnel under the Lincoln Memorial would eliminate vehicular traffic in front of the Memorial. Depressing 17th Street would permit a continuous green area from the Memorial to the Washington Monument. The street would terminate in an overlook where people could view the Tidal Basin and Jefferson Memorial to the South. A change in grade to the west of the Washington Monument provided a plaza which would be reached by a series of steps.

Interior circulation of the Mall would be provided by minibus service along Constitution and Independence Avenues. Private cars could be parked in screened parking areas beside the Reflecting Pool or in underground parking areas planned to be near the National Gallery of Art. People would then travel by minibus along the Mall. The trip would continue into Arlington National Cemetery. Stops could be made at points of interest along the route.

An interesting and important feature of the plan was the development of a sculpture garden in the square west of the National Gallery of Art and in the L'Enfant Square to the south, a kiosk was planned. Benches would be provided under the trees along the Mall.

The members discussed the plan and approved the general diagram. The success of the plan, they commented, would depend on the development of the details which should be done by outstanding landscape architects working with Mr. Webel. They recommended that the Sculpture Garden and kiosk square be developed in the first phase of the project.

At the request of the Commission, Secretary Udall attended the afternoon session and discussed the development of the Mall with the members. He commented that he had considered the plan as the initial step. The continued development of the plan concerned him. He requested the advice of the members concerning procedures required to develop the plan.

The members commented that the idea was impressive but that the design of the various parts lacked harmony and appeared unrelated. A modulation of the beaux arts and modern architectural designs of the nearby buildings should be attempted in the plan.

Chairman Walton summarized that the Mall must not be sealed off from the various activities in the city and become just another tourist attraction but that it should relate to and be a part of the city. He stated that such a large project required the ideas of more than one landscape architect. The project should develop as the Pennsylvania Avenue Plan. In that Plan, outstanding city planners and landscape architects had expressed their ideas which lead to a total plan. At the request of the members, he recommended that Mr. Dan Kiley and Mr. Sasaki be commissioned to work with Mr. Webel in developing the details and that the two Squares - the Sculpture Garden and the kiosk square - be developed first.

The members thanked Secretary Udall for his excellent idea to vitalize the Mall and for the help which he has given in projects of interest to the Commission.

Secretary Udall thanked the members for their views, advice and guidance in developing the Mall. He agreed that the two squares should be constructed first and that Mr. Kiley and Mr. Sasaki should work with Mr. Webel in developing the details.

b. Reflecting Pool

Secretary Udall requested advice on converting the Reflecting Pool into an ice skating rink. The members commented that a commercial skating rink was inappropriate for this area. The Reflecting Pool could be used as a skating rink when the weather permitted but should not be developed commercially as a skating rink. Disapproving this project, the members stated that there were other areas within the city that could be developed as ice skating rinks.

c. Potomac River

Secretary Udall discussed informally plans for areas along the Potomac River. Reclaiming the land and developing a plan for the area would be a project comparable to the development of the Mall and the

Pennsylvania Avenue Plan. Secretary Udall regretted the need for more bridges across the Potomac within this section, but noted that the question of bridges was related directly to the question of a mass transportation system.

d. Memorial Marker to President Franklin D. Roosevelt - Revised Design (Added to the Order of Business)

The Secretary presented a drawing prepared by the National Park Service of a revised design for a memorial marker to President Roosevelt which would be placed on Reservation 36, located at Pennsylvania Avenue, Indiana Avenue, and Ninth Streets, N.W. The members thought the design appropriate for a cemetery but not for a small triangular city lot near heavily traveled streets. They recommended that the design be longer and lower. They suggested that there be no base to the marker.

The Secretary prepared a letter for the Chairman's signature expressing the Commission's disapproval of the design and submitting the recommendations of the members. EXHIBIT A

2. Bureau of the Budget

Proposed Executive Order

Copies of a proposed Executive Order (EXHIBIT B) establishing a Temporary Commission to Implement the Report on Pennsylvania Avenue were distributed to the members for review. The Chairman requested the members to study the Order and to discuss their views of it on the following day.

3. General Services Administration, Public Buildings Service

a. National Air and Space Museum - Revised Design

The Secretary presented drawings and photographs of the revised design for the National Air and Space Museum of the Smithsonian Institution which were submitted by Mr. Gyo Obata, architect. The pattern of the soffitt continued directly into the pattern of the ceiling. The windows of the office area had been enlarged. These details had been restudied at the request of the members of the Commission which was made during the October meeting.

The members discussed the revised design and expressed the opinion that the design appeared heavier than the original design. This heavy appearance contributed to the feeling that the building was being pushed into the ground, a factor which was not apparent when the original design was presented.

Final action was withheld until a conference with the architect on the following day.

b. Social Work Building, Howard University - Revised Design

The Secretary presented a site plan and sketch of the revised design for the Social Work Building, Howard University, as submitted by Justement, Elam, Callmer & Kidd, architectural firm. The site plan had been approved by the National Capital Planning Commission. The sketch of the revised design indicated that the roof of the first floor would be a terrace with the second and third floors sitting on top of the terrace which would connect with the formal courtyard of Howard Hall.

Although the design was improved, the members thought it did not meet the quality of design appropriate for Howard University. They commented that the second and third floor should be related more closely. The ground and first floor should be treated similarly.

Final action was withheld until a conference with the architect on the following day.

c. Federal Office Building No. 5 - Revised Design

Mr. David Dibner, consulting architect, discussed the revised design for Federal Office Building No. 5, which included the recommendations of the Commission that the fenestration for the east/west elevations of the building have the same design as the building spanning 10th Street and that the north/south elevations remain solid. On top of the elevator penthouse, a small section was set back from the east/west elevations and flush with the north/south elevations. This location created notches at the end of the window sections. The additional section was required by General Services Administration to house window washing equipment.

Mr. Bunshaft expressed the views of the members by stating that the design was much improved but that the area, which would house the window washing equipment, should be on the same plane as the rest of the building thus eliminating the notches.

Mr. Dibner stated that the architects had studied the recommendations of the Commission for landscaping the area. The grove of trees, as planned, did provide a "see through", and was necessary since the large paved plazas within the total project prevented great amount of trees. Although the grove in front of the building spanning 10th Street was retained, there was a smaller number of trees.

Mr. Sasaki suggested that 4 rows of trees would be better than the 5 rows contemplated. He stated that the 15' to 20' height of trees would not obstruct the arbor effect of the building's design.

Mr. Bunshaft commented that the 2 great rectilinear buildings needed more roundness and informality to counterbalance the design. The members suggested that clusters of "street" trees should be used in an informal

arrangement.

The members approved the design of the building with the recommendations that the area containing the window washing equipment be on the same plane as the rest of the design. The revised landscape plans will be forwarded to the members for review and comment before the next meeting.

The Secretary prepared a letter for the Chairman's signature to General Services Administration, expressing the members' approval with the specific recommendations cited above. EXHIBIT C

4. Department of the Navy, Area Public Works Office

General Purpose Laboratory, Naval Research Laboratory - Proposed Design

The Secretary presented and explained a rendering of the proposed building which was designed by Fisher, Nes, and Campbell as a steel building with precast concrete elements. The design blended with that of the building next to it.

Laboratory and office space within the structure were planned for maximum flexibility. An open area under the first floor would be used by loading and delivery trucks. The first three floors would contain laboratory and office space with mechanical equipment on the fourth floor. The penthouse would be for special laboratory use with an attached planetarium.

The location of the building follows a master plan developed for the area. Site development will include approach roads, sidewalks, utilities and a detached parking area. Final landscape plans will be part of a future plan designed for the entire group of buildings.

Formal action was withheld pending a conference with officials of the Department of the Navy and architects on the following day.

5. District of Columbia Government

a. Board of Commissioners

Permanent Installation of Bell as Official Gift from Bangkok, Thailand

The Secretary presented a color photograph of a Bell which was presented to the City of Washington, D. C. as a gift from the people of Bangkok, Thailand. The District Commissioners had requested the advice of the Commission of Fine Arts on a location for the Bell.

In forwarding the bell, the Lord Mayor of Bangkok had written District Commissioner Walter Tobriner requesting that a suitable public place or

park be found so that all may see it.

The members agreed that the enameled material of the Bell and the weather of Washington required that it be installed indoors, preferably in the entrance to the District Building.

b. Department of Highways and Traffic

Ninth Street Expressway - Revised Design

The Secretary presented and explained the revised design and a scale model of the Ninth Street Expressway, developed by engineers of the Highway Department. There would be no retaining walls above the street level and the railing which was lowered would be heavy and dark. Samples of light granite were shown for the exterior portion of the overpass and white tile for the tunnel section which will have recessed lighting.

The termination of the overpass was near a plaza where benches and trees were planned to provide a rest stop for people waiting for buses, and for people working in the nearby buildings. Chairman Walton, in a preview of the design,had requested that the plaza continue to the overpass.

In discussing the landscape plans for the plaza, Mr. Sasaki commented that the design was pretentious and out of scale. The development of the plaza as a rest stop was not appropriate since the site was an island in a heavily traveled area.

The members agreed that the overpass should extend to the plaza and that the landscape plan for the plaza should be a part of the overall plan developed for office buildings in the area.

Formal action was withheld until a conference with officials of the Department of Highways and Traffic on the following day.

c. Department of Buildings and Grounds

Elementary School, 7th and Webster Sts., N.W.-Proposed Design

The Secretary presented drawings prepared by Mr. Milton Prassas, architect for the Elementary School, 7th and Webster Streets, N.W. Photographs of the two-story buildings with mansard roofs which are in the Sherman Circle area, near the school, were presented also. The design of these buildings in the neighborhood was reflected in the design of the school building.

Two major elements were planned for the building. In the area facing Sherman Circle, a single-story element was planned for an all-purpose room.

Other activities were to be in the lower story of the second element with classrooms on the upper floors. This higher element was away from the circle. Areas for service parking and leading to the main entrance of the building were the same. A free-standing chimney gave a vertical element to the design.

Although the design was an improvement over other elementary school designs previously submitted to the Commission, the members thought that it required further study.

Formal action was withheld until a conference with the architects on the following day.

d. Department of Licenses and Inspections

(1) Shipstead-Luce Act

(a) Watergate Development

The Secretary stated that drawings for the Watergate were submitted as a matter of form since the Commission had asked whether or not the three connecting links could be eliminated legally. He commented that one could be eliminated but that the two connecting the office building and hotel had to be retained according to the Board of Zoning Adjustment. Although disappointed by this fact, the members had no other recourse but to approve the design.

A report of the Commission's approval was forwarded to the Department of Licenses and Inspections with a request that the color and texture of exterior material be presented in full scale panels constructed on the site and reviewed by the Commission before a permit is issued.

(b) 2201 Virginia Avenue, N.W., Proposed Apartment - Revised Design

The Secretary presented drawings prepared by Gitlin and Canton & Associates, architects for the apartment house. He commented that the problem had been the excessive thickness and profile of the bands which the architect had stated, during the November meeting, were required to meet the legal minimum space between floors.

The members of the Commission were disappointed to find that the architect had not solved the problem of the bands for the heating units. They suggested that strong contrast be avoided in the colors and values of the exterior material. To avoid strong contrast they recommended grayish brown brick, limestone floor slab, light sand color panels under the windows, and dark matal trim on the windows, etc. Revised drawings of the design which show an expression of floor slab uniformly carried around

the south and east elevations and samples of all exterior materials are requested for review.

A report of the Commission's request that the design, specifically the bands, be restudied was forwarded to the Department of Licenses and Inspections.

(c) Signs for Peoples Drug Store - 1425 G St., N.W.

The Secretary presented a request for review of four signs to be erected on the Peoples Drug Store building which faced the Department of Treasury Building. The members agreed that the location, excessively large size, and design of the signs which would have frosted plastic letters, were not appropriate for the area.

A report of the Commission's disapproval was forwarded to the Department of Licenses and Inspections. Recommendations were made that the signs be located over the entranceways or incorporated in the window fascia, have a maximum area of 25 square feet for each street (14th and G), and have opaque-faced lettering with backlighting.

(d) Proposed Amendments to Article 75 of the Zoning Act

A discussion of the proposed amendments to Article 75 of the Zoning Act was withheld until the February meeting to permit the members more time to study this subject.

(e) St. Augustine's Chapel - 600 M St., S.W.

The Secretary stated that this project had been withdrawn from the order of business. The minor problem had been resolved.

(f) Building Applications, Appendix 1

The Commission approved the actions proposed by the staff on Shipstead-Luce Applications listed on Appendix 1 EXHIBIT D

(2) Old Georgetown Act

(a) 1401 Wisconsin Avenue, N.W., Peoples Drug Store - New Building

The Secretary explained the problems the Old Georgetown Board and the staff were having with the design of this building. The site of the building was the last major space along Wisconsin Avenue, where O Street intersected it at an odd angle. The Board preferred a two-story building which would follow the street lines of shops. This the owners refused.

The Board then asked that the shape of the roof be uniform with others

in the area and not adjusted to the shape of their building. A small open space on the corner of Wisconsin Avenue and O Street could be used as an entrance corridor. The cornices as proposed by the Board would not be visible. The members approved the recommendations of the Old Georgetown Board and staff.

A report of the Commission's approval of the recommendations was forwarded to the Department of Licenses and Inspections.

(b) Building Applications

There were no objections to the actions taken on Old Georgetown Act applications listed on Appendix 2. EXHIBIT E

6. Commission of Fine Arts - National Capital Planning Commission

Joint Study - Washington Skyline

Mrs. Chloethiel Woodward Smith, architect, introduced the study of the Washington Skyline she had made for the National Capital Planning Commission. The study was a continuation of the Marcou, O'Leary, and Carl Feiss Skyline Study which would be a part of the 1985 comprehensive planning study by NCPC. This new study was necessary, the Planning Commission thought, to prevent further high-rise apartments in crucial areas of the city as along the edge of Rock Creek Park. According to Mrs. Smith, the studies and surveys led to the conclusion that selective locations for higher buildings could be accommodated in a design that preserves the character of the old city and still responds to demands for new directions in city designs. New centers of high density could be accommodated if they can be separated by low-density areas. A multiple-centered city could be more livable than a single-centered city that grows by pushing high density out in all directions from a single center. *See pg. 11a

Mr. Szczepanski of Mrs. Smith's office explained in detail the many sketches illustrating the results of the study. He emphasized that the total design of the city was studies rather than the single approach of developing individual areas. The peaks and valleys of the area were considered. By emphasizing peaks and valleys, an interesting skyline could be developed which, he thought, would avoid the monotone, slab - type skyline now maintained under the existing Zoning Regulations. The results of the study revealed that green areas, open spaces and existing vistas need not be destroyed to accommodate new housing developments.

In commenting on this study the members thought it was most interesting but that the plan was not appropriate for Washington. Doubts were expressed by Mr. Kelly concerning the control of the plan by peaks of the area when other controls, as transportation, were important in developing cities to modern life. Mr. Bunshaft stated that in developing Paris and Rome to modern times, plans were made for high-rise buildings to be constructed

Commission of Fine Arts
Minutes for regular Monthly Meeting on 12 January 1965

Insert-page 11, item 6, first paragraph.

Joint Study-Washington Skyline

The studies and surveys led to the conclusion that the recognition of the "skyline path", which would generally follow the 150' contour rim of the surrounding hills, would be an excellent design feature in the plan of the city. This path could become an "Appalachian Trail" where pedestrians would obtain many excellent views of the monumental area of Washington.

Note: Above inserted at the request of Vice-Chairman Kelly made during the 16 February 1965 meeting.

in the suburbs which would not affect the heart of the city. He commented that London had a high-rise constructed in the heart of the city which clearly illustrated the need to plan such construction in the suburbs.

IV. LEGISLATION

1. Letter from Congressman Reuss reference proposed bill "to improve the artistic and architectural quality of federal buildings outside the District of Columbia."

The Secretary stated that the bill would provide architectural review for all Federal buildings in all 50 states of the United States. Congressman Reuss desired to know if the Commission of Fine Arts would assume this responsibility.

The members stated that the review of architectural designs of all Federal buildings in the United States would be impossible for the Commission, constituted of 7 members meeting 2 days a month. The Commission does advise the General Services Administration on the selection of painters and sculptors for Federal buildings. The members commented that the selection of architects for Federal buildings might also be reviewed by the Commission.

The Chairman forwarded a letter to Congressman Reuss expressing the members views. EXHIBIT F

2. D. C. Parking Facility Act of 1965 - Draft legislation for establishment of a parking authority for the District of Columbia.

The Secretary reviewed briefly the purpose and provisions of the proposed legislation. The purpose of the legislation was to establish a Parking Board, as a District Government agency, which would have three members - the three Commissioners, ex officio. The legislation provided that the Parking Board be empowered to construct or acquire parking facilities and be required to arrange to have qualified private persons operate such facilities.

The Parking Board would be authorized to operate the facility only temporarily until a qualified operator assumed the responsibility for operating it. The rates, prescribed by certain standards, would be established by the Board and would be subject to revision from time to time.

The members approved the draft of the legislation and recommended that the sites and design for the parking facilities be submitted to the Commission of Fine Arts for approval.

The Secretary prepared a letter for the Chairman's signature forwarding the Commission's views and recommendations to the Board of Commissioners

of the District of Columbia. EXHIBIT H

The meeting adjourned at 6:03 pm to reconvene at 9:30, Wednesday, 13 January 1965.

Respectfully submitted.

C. H. Atherton
Secretary

18 January 1965

Dear Connie:

In our telephone conversation I described to you the Commission's feelings about the design submitted for the Roosevelt monument on Pennsylvania Avenue.

Our first objection was that the design looked like a tombstone due to the shaping and to the kind of base it had. You remember I told you how one of the Commission members quickly redesigned it by standing the stone on end and turning it into a vertical monument with sharp edges and no base. You pointed out to me that this would make ridiculous the bronze plaque on the side which recalls that F.D.R. asked for a monument about the size and shape of his own desk. The Commission certainly is not adamant in its stand and I think, but cannot guarantee, that the Commission would approve a horizontal slab if it did not have either a base or the kind of shaping that recalls a tombstone.

You know I want to do everything I can to facilitate this project and you can count on me for full cooperation.

With best wishes,

William Walton
Chairman

Mr. Conrad With
Room 5600
30 Rockefeller Plaza
New York, N.Y.

EXHIBIT A

EXECUTIVE ORDER

ESTABLISHING A TEMPORARY COMMISSION ON PENNSYLVANIA AVENUE

WHEREAS Pennsylvania Avenue between the Capitol and the White House serves as the main ceremonial avenue connecting the centers of the Legislative and Executive Branches of the United States Government; and

WHEREAS parts of Pennsylvania Avenue have been in large measure developed in a manner consistent with that purpose; and

WHEREAS other parts of Pennsylvania Avenue have deteriorated in condition and design or are otherwise ill-suited to the ceremonial purposes of the Avenue and to the National dignity; and

WHEREAS the President's Ad Hoc Committee on Federal Office Space called the attention of the President to the deterioration and obsolescence of Pennsylvania Avenue and recommended that he enlist the aid of the finest architectural talent in the Nation to develop plans for the improvement of Pennsylvania Avenue to reflect its National significance, and

WHEREAS the President requested distinguished members of the architectural and city planning profession to serve on an Advisory Council on Pennsylvania Avenue and to develop a plan for the improvement of the Avenue to a level commensurate with its National purpose; and

WHEREAS Congress, in support of this objective, appropriated funds to assist in the preparation of such plans; and

WHEREAS the President's Advisory Council on Pennsylvania Avenue has developed a general plan for the improvement of the Avenue which, after extensive review by Executive departments and agencies, has been deemed

EXHIBIT B

appropriate in its main features for the achievement of these purposes, and the Council has been dissolved; and

WHEREAS the Congress will be asked to consider the means for achieving the ultimate improvement of Pennsylvania Avenue:

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States, it is hereby ordered as follows:

Section 1. Temporary Commission on Pennsylvania Avenue

(a) There is hereby established the Temporary Commission on Pennsylvania Avenue (hereinafter referred to as the Commission).

(b) The Commission shall be composed of the Secretary of the Interior, the Secretary of the Treasury, the Secretary of Labor, the Secretary of Commerce, the Attorney General, the Postmaster General, the Administrator of General Services, the Housing and Home Finance Administrator, the Chairman of the Commission on Fine Arts, the Chairman of the National Capital Planning Commission, the Secretary of the Smithsonian Institution, the President of the Board of Commissioners of the District of Columbia, and such other members as may be appointed by the President. The Chairman shall invite the Architect of the Capitol to be a member of the Commission.

(c) The President shall appoint a Chairman of the Commission who shall serve as its director and who shall receive such compensation as the President may specify.

(d) Members of the Commission who are officers or employees of the Federal Government shall receive no additional compensation by virtue of membership on the Commission. Other members of the Commission shall be entitled to receive compensation and travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 55a; 5 U.S.C. 73b-2) for persons in the Government service employed intermittently.

(e) The Commission shall meet at the call of the Chairman.

Section 2. Functions of the Commission

(a) The Commission shall advise the President with respect to:

(1) the component parts of the general plan submitted by the President's Advisory Council on Pennsylvania Avenue respecting their feasibility and practicability from the standpoint of financial, engineering, planning, and other relevant considerations;

(2) the development of an orderly, phased program for carrying out the improvement of Pennsylvania Avenue;

(3) effects of the improvements on owners and occupants of private property in and adjoining the area to be improved and actions respecting the improvement program that will assure its achievement with minimum harmful effects upon such private interests and with the least disruption of business within and adjoining the area;

(4) appropriate legislation for carrying out the program of improvement;

(b) Promote an understanding of the plan and its objectives among the public generally; and

(c) Undertake such other actions as may be authorized by law and requested by the President in furtherance of the objectives of this order.

Section 3. Commission staff and consultants

(a) The Chairman is authorized to appoint such personnel as may be necessary to assist the Commission in connection with the performance of its functions.

(b) The Commission is authorized to obtain services in accordance with the provisions of Section 15 of the Act of August 2, 1946, (5 U.S.C. 55a), at rates not in excess of $100 per diem for individuals.

Section 4. Federal agencies

(a) As deemed necessary to facilitate the work of the Commission, the Chairman may request the head of any Executive department or agency whose activities may relate to the objectives of the Commission to designate a liaison officer to consult with the Commission on matters of common concern.

(b) Upon request of the Chairman, each Executive department or agency is authorized and directed, consistent with law, to furnish the Commission available information which the Commission may require in the performance of its functions.

(c) Each Federal agency represented on the Commission shall furnish such necessary assistance to the Commission as may be authorized by Section 214 of the Act of May 3, 1945, 59 Stat. 134 (31 U.S.C. 691), including the assigning of personnel to temporary duty with the Commission.

(d) The General Services Administration is hereby designated as the agency which shall provide administrative services for the Commission on a reimbursable basis.

THE WHITE HOUSE,

, 1964

ACTION: Recom'd. 1/7/65.

175	1218 Wisc. Ave., NW W. H. Wrenn, Commercial	Install new bay window & alter front of exist. bldg.

ACTION: Recom'd. as revised provided that metal brackets areeither omitted or made of wood with a thicker & More substantial profile. Request sketch of this detail only, 1/8/65.

January 15, 1965

Dear Henry:

You are right in assuming that the Commission of Fine Arts does not want to have its jurisdiction extended throughout the fifty States. Ours is a seven man Commission that serves without pay and would find it impossible to assume the burden of passing on all Federal architecture throughout the nation.

As things stand now, we do advise General Services Administration on the selection of artists and sculptors whose work becomes part of government structures throughout the country. The choice of architects rests in GSA and the creation of a panel to assist in the choice is a difficult matter. I don't think it should ever be put in the hands of the American Institute of Architects (a professional organization rather equivalent to the American Medical Association but not as reactionary) because there are plenty of good architects who are not members of that organization.

When you get around to drafting your bill I would be most happy if you would let me have a look at it in a preliminary stage. We have been dealing with these matters and we might be helpful.

With best wishes,

William Walton
Chairman

Honorable Henry S. Reuss
U. S. House of Representatives
Washington, D. C.

EXHIBIT F

25 January 1965

Dear Mr. Ropshaw:

In reply to the District Commissioners request of 29 December 1964, the Commission of Fine Arts carefully considered the proposed Parking Facilities Act of 1965 and supports the legislation essentially as drafted.

The only change we would like to recommend is the inclusion of an additional section, similar to section #229, providing for the review by the Commission of Fine Arts of all proposals by the Parking Board that would affect in any way the appearance of the city. This would include, in our opinion, open lots and below-grade garages as well as conventional buildings designed to store cars.

As parking facilities of all types probably have more impact than any other land use or activity, the Commission feels that careful study of all new installations is an essential safeguard to the city, and will probably prove to be a valuable means in correcting undesirable conditions where such facilities already exist.

We hope this recommendation is favorably met by the District Commissioners.

For the Commission of Fine Arts:

Sincerely yours,

William Walton
Chairman

Mr. F. E. Ropshaw
Secretary
Board of Commissioners of the
District of Columbia
District Building
Washington, D.C. 20004
